Hamlet

The importance of Confidex®

The level of support and service offered by Corus is the main reason behind Hamilton Associates continued specification of Colorcoat® products. Having used Corus extensively for many years, one of the architects most recent developments is on Ashburton Road in the Trafford Industrial Park.

The Trafford Industrial Park was the first of its type and has continued to grow for over a century into one of the largest in the world. The commercial units 1-13 on Ashburton Road use steel portal frame construction with pre-finished steel roof and wall cladding.

Ashburton Park Trafford Park, Manchester

“We have used Colorcoat HPS200® in Merlin Grey for the roofs and Hamlet for the walls together with Colorcoat Celestia® on a large number of commercial units on the site,” says Alistair Milne of the practice. “Both products are backed up by the *Confidex* guarantee, and the peace of mind that this brings to our clients is a major reason for the product specification.”

The *Confidex* guarantee is the most comprehensive in the UK for pre-finished steel products and is exclusive to Corus. Issued directly to the building owner, it reduces risk and ensures complete reinstatement in the unlikely event of a problem.

“We always promote the *Confidex* guarantee for *Colorcoat Celestia* and *HPS200* as it confirms the durability and high performance of the products,” continues Mr Milne. “We demand the highest quality products in our construction projects, but equally we expect a solid and supportive framework from the manufacturers, in terms of technical support, advice and assistance. This is the level of support we receive from Corus and the reason why we continue to specify their *Colorcoat* products”.
